

# Introduction to Illustrative Flow Visualization

**Andrea Brambilla** (University of Bergen)

**Robert Carnecky** (ETH Zurich)

- Which image would you use for navigation?

Images from Google Maps

- Inspired artists and illustrators
- ... but **interactive**
- Show **relevant information...**
- ...using **visual abstractions**

## Perceptual Effectiveness

[SGS05]

## Visibility Management

[CFM\*XX]

## Focus Emphasis

[CSC07]

## Visual Explanation

[AWM10]

## Raw Data

## Integral Structures

## Flow Features

Images generated with SimVis

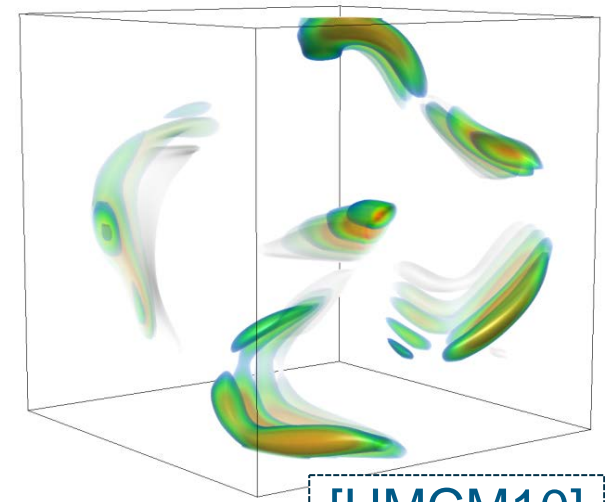

- Flow data is *multivariate* → What to show? How?
- Flow data is *dense* → Cluttering and occlusion
- Flow data is *unsteady* → Temporal evolution hidden

[PBL\*04]

[CFM\*XX]

[HMCM10]

- Visualization user
  - ↗ Data representation ✓
  - Visualization needs ✓
  - ↘ Technical Vis details ✗
- 2-axis classification based on user knowledge:

## Data repr.

- RAW DATA
- INTEGRAL STRUCTURES
- FLOW FEATURES

X

## Vis needs

- PERCEPTUAL EFFECTIVENESS
- VISIBILITY MANAGEMENT
- FOCUS EMPHASIS
- VISUAL EXPLANATION

	PE	VM	FE	VE
RD				
IS				
FF				

## Classic hedgehog vis

- Inefficient
- Hard to grasp

## Data Painting and Texture Advection

- Display multiple variables at once
- Convey additional information

[KML99]

[vW02]

# Example: Occlusion & Cluttering

[CFM\*XX]

## Simple transparency

- Details are hidden
- Depth-ordering issues

## Smart shading

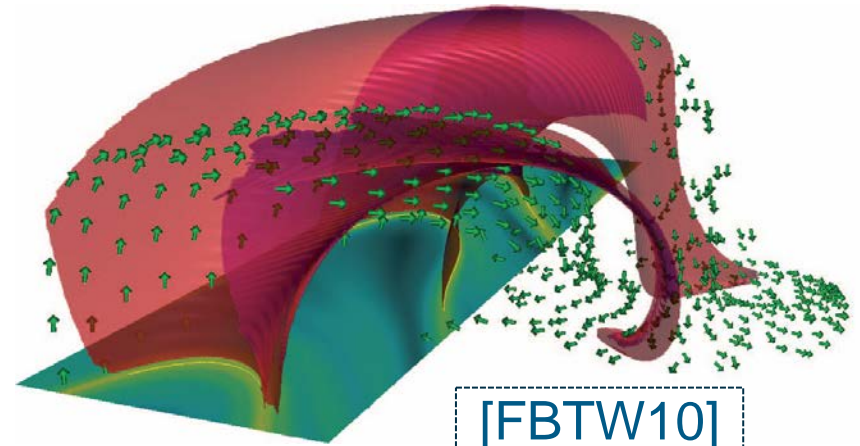

- Uncover small details
- Improve spatial perception

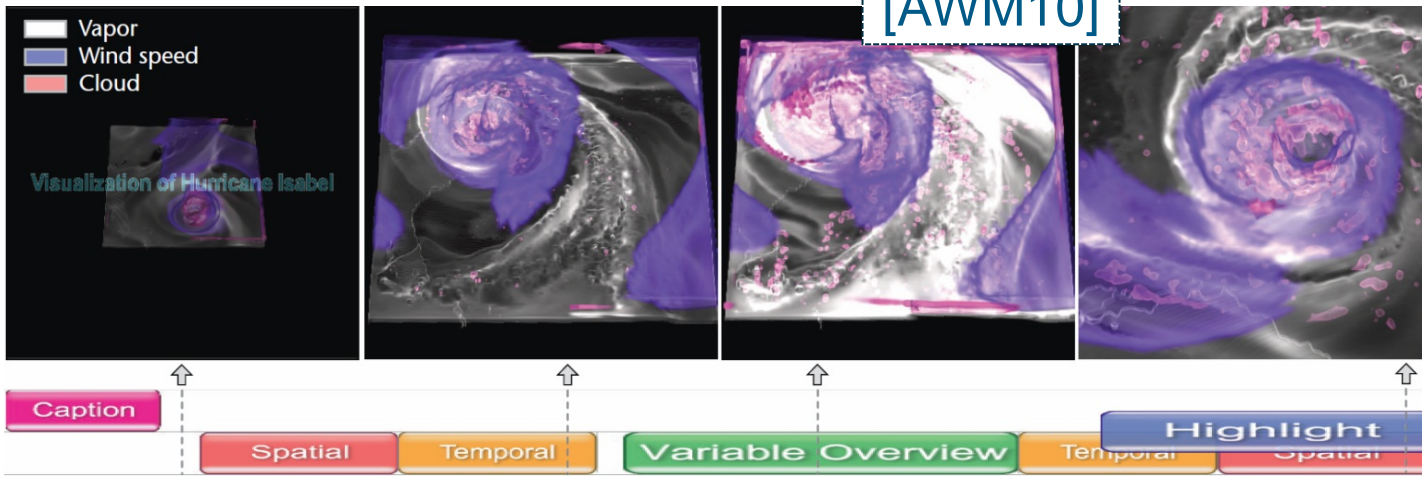

[CFM\*XX]

## Focus-based Seeding

- Convey important info
- No occlusion from context

[FBTW10]

	P	V	F	V
	E	M	E	E
RD				
IS				
FF				

## Storytelling

- Expressive presentation
- Multiple points of view

## Temporal Implosion

- Data from many timestep
- Temporal evolution of flow

- IllustraFlow Vis enables flow analysis at different **visual abstraction levels**:
  - Make flow data more understandable
  - Expose hidden aspects of flow data
- Choosing the right technique is easy:
  - What is the current **flow data representation**?
  - What **visual enhancements** are needed?
- What should we expect?
  - IllustraFlow Vis based on **semantic** aspects and **physical** properties of the flow phenomena
  - Close **collaboration** between visualization experts and application experts

# Thanks for your attention!

## Questions?

- Based on: BRAMBILLA A., CARNECKY R., PEIKERT R., VIOLA I., HAUSER H.: **Illustrative Flow Visualization: State of the Art, Trends and Challenges**. To appear in *Eurographics 2012 State-of-the-Art Reports* (Cagliari, Italy, 2012)
- The project SemSeg acknowledges the financial support of the Future and Emerging Technologies (FET) programme within the Seventh Framework Programme for Research of the European Commission, under FET-Open grant number 226042.
