

Automated Methods in Information Visualization

Helwig Hauser (Univ. of Bergen)

Visualization? Information Visualization?

- Vis ... Visualization
- InfoVis (or IV) ... Information Visualization
(SoftVis ... Software Visualization, ...)
- SciVis ... Scientific Visualization
(VolVis ... Volume Visualization, FlowVis ... Flow Visualization, ...)
- VA (or VAST [or IVA]) ... Visual Analytics
- GeoVis ... Geographic Visualization
- Statistical Graphics, Statistical Visualization
- HCI ... Human-Computer Interaction
- Graph Drawing
- Information Design, Information Graphics
- ... (Architectural Visualization, ...)

Integrated Methods

- Clustering
 - k-means
 - hierarchical clustering methods
 - etc.
- Projections (embeddings), e.g., for dimension reduction
 - PCA
 - MDS
 - etc.
- Classification, regression
 - decision trees
 - SVM
 - etc.
- Etc.

Levels of Integration

- In most of Information Visualization:
 - no integration
- Then you find:
 - the visualization of ML results
- You also find:
 - approaches to make ML interactive
- Very rarely you find:
 - tight integration of ML and InfoVis to solve problems

[Maniyar & Nabney;
MDM 2006]

[Williams & Munzner;
InfoVis 2004]

Some Examples

- Integration of clustering

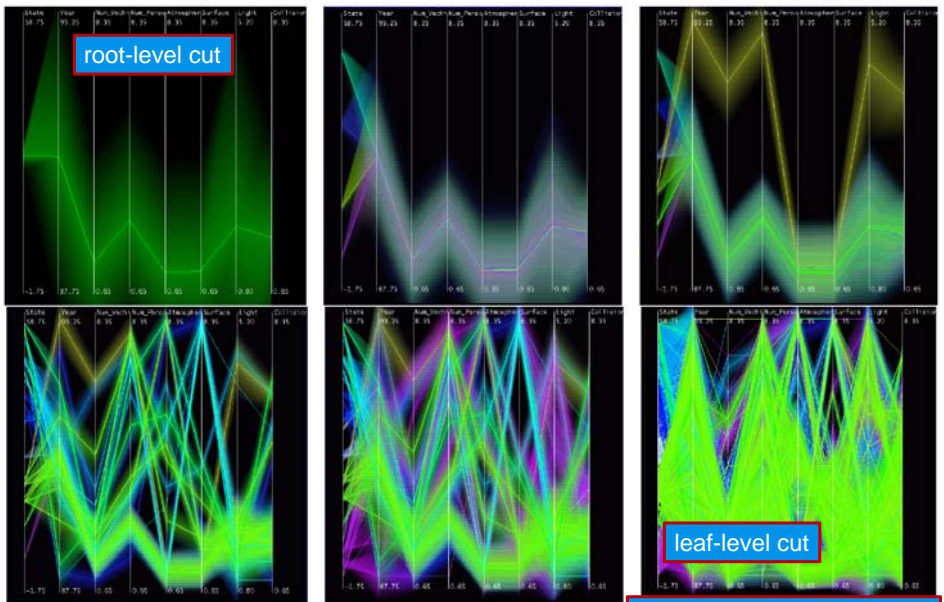

- Integration of projection/embedding

- Integration of classification/learning

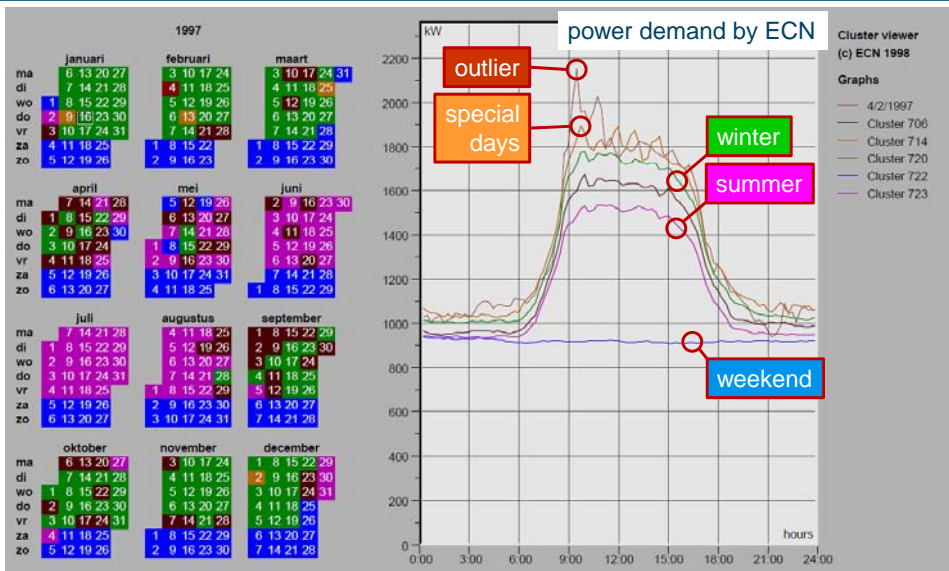

Hierarchical Parallel Coordinates

[Fua, Ward, Rundensteiner; Vis 1999]

hierarchical clustering used

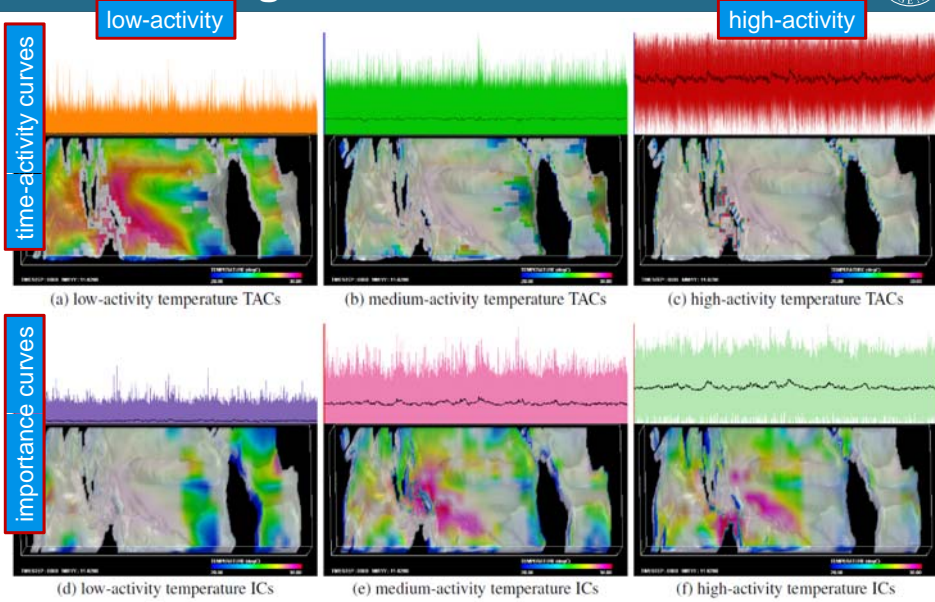

Calendar view example

[van Wijk & van Selow; InfoVis 1999]

hierarchical clustering used

Time-varying Multivariate Climate Data

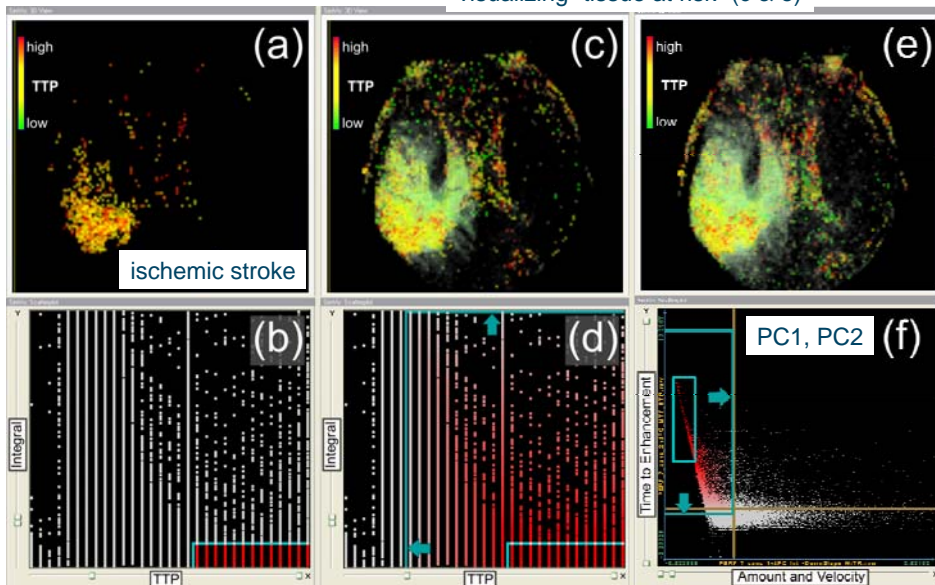

[Sukharev, Wang, Ma, Wittenberg; PacificVis 2009]

k-means clustering used

Perfusion data IVA

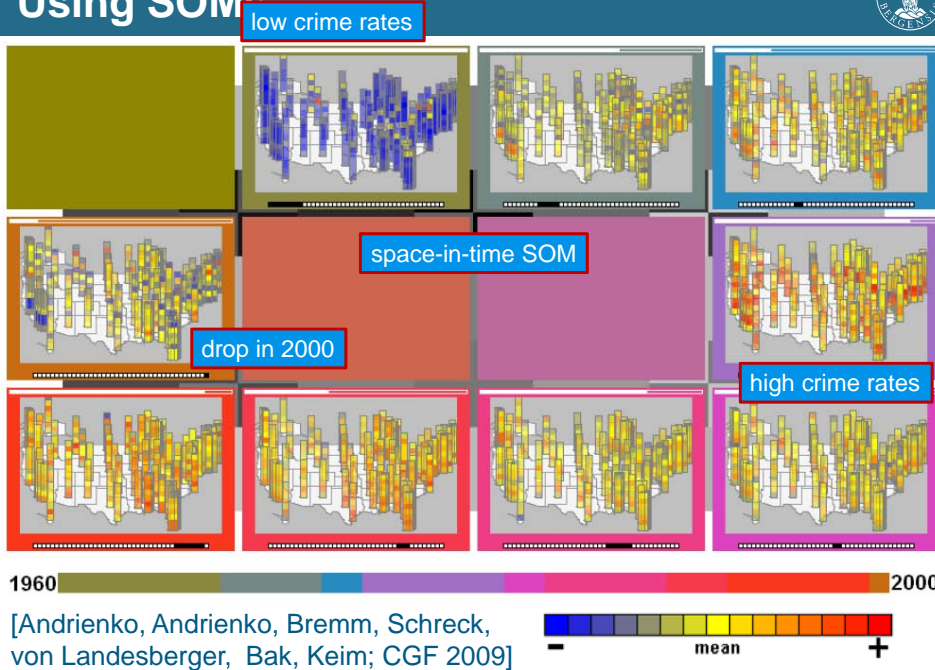

visualizing "tissue at risk" (c & e)

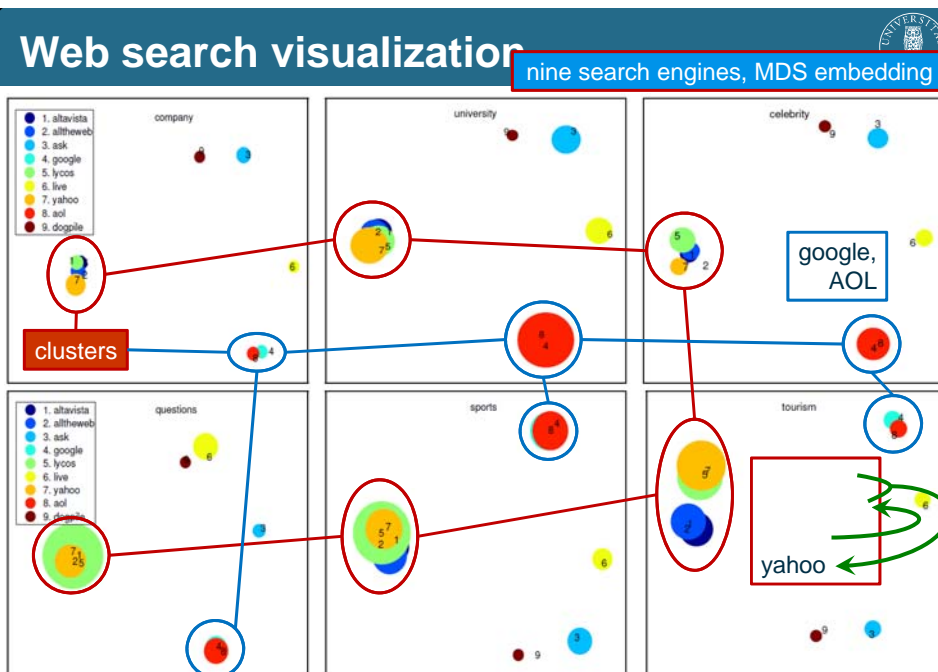

[Oeltze, Doleisch, Hauser, Muigg, Preim; TVCG 2007]

Using SOMs

Web search visualization

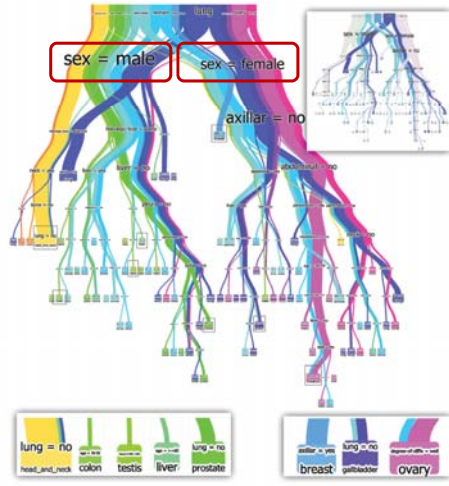

BaobabViews (decision trees)

tumor location classification

same classification, manual sex-split

misclassification

hard to separate

typical male

typical female

[van den Elzen, van Wijk; VAST 2011]

Visual Human+Machine Learning

start focus: high temp.

ML tell: density is related!

larger search: more results...

three interpretations (A, B, C)

[Fuchs, Waser, Gröller; TVCG 2009]

Problem solving with ML and InfoVis?

- Problem solving with ML and InfoVis
 - it's not about ML, it's not about InfoVis
 - it's about solving problems (with ML & InfoVis)
- Inner vs. outer integration
- Concept of a toolbox of enabling technologies
 - integrate visualization
 - show to the user
 - let the user interact
 - integrate ML
 - give feedback quickly
 - be explained
- A form of visual analytics (or visual computing)

Acknowledgements

- **You** – thank you for your attention!
Question?

- Çağatay Turkey
- Many!
